Contractor Procedures FAQ's

What is real time location sharing?

Real time location sharing also known as Geo-fencing refers to a technology that uses GPS or RFID to create a virtual boundary around a specific geographic location. When you click on a Modus Job your device enters or exits this defined area, Modus will receive notifications of your presence within this defined job perimeter as defined by the Company.

Who collects my real time location sharing information?

OracleCMS will collect your initial data for the purpose of logging in and logging out. This data is only used in real time to confirm location when checking in and out of a job.

No data is stored, it is only captured in real time during the log in and log out process.

When does the real time location start and stop tracking me?

Location is only tracked when logging in and logging out of the job via the Unify link. No location tracking will occur outside of the log in and log out process.

What do I consent to by clicking the Modus job link?

By clicking on the Modus job link you allow Unify to ping you location via the GPS on your phone when you log in or log out of an individual job. You agree that your device's location data may be accessed by Modus and used to provide notifications, safety reports analytics and analysis strictly limited to Modus job link.

What location data is collected?

The only data obtained is the GPS location of the device used to log in and log out of Unify platform at the time of the log in or log out attempt.

How is my data kept private?

Data is not maintained on the OracleCMS servers. All data captured is sent to the Modus team directly via the TSM API. No GPS location data will be held by OracleCMS.

Modus will treat the data in accordance with it Privacy Policy [include link]

How can I opt out of Unify Location sharing?

Users can switch off GPS on the device, which will stop the system from accessing the live location. If this occurs, the system will automatically set the GPS coordinates to 0 for both longitude and latitude.

This will result in suspension of payment of your invoice and commencement of investigation by Modus.

Where can I get more information on OraclesCMS policies and procedures on data protection, collection, security and retention.
